

Google Earth Plugin

The **Google Earth Plugin** is a web browser **plugin** that lets users navigate and explore data on a 3D globe on a web site. ION is proud to provide this new tool to our customers and web visitors but before you can interact with it you will need to install the plugin.

[Click here to visit the Google site to install the plugin.](#)

Below are the instructions and system requirements needed to load and view the globes.

System Requirements

The Google Earth Plugin is currently available for the following operating systems and web browsers:

Microsoft Windows (2000, XP, and Vista)

- Google Chrome 1.0+
- Internet Explorer 6+
- Firefox 2.0+
- Flock 1.0+

Apple Mac OS X 10.4 and higher (Intel and PowerPC)

- Safari 3.1+
- Firefox 3.0+

You should also ensure that your system meets the [requirements for Google Earth](#) to ensure optimal performance.

Support

If you're experiencing trouble with the Google Earth Plugin on our website, please contact webmaster@iongeo.com or try posting to the [Google Earth Plugin discussion forum](#).
