

I/O Announces Exclusive Vibrator Spare Parts Agreement

HOUSTON – February 15, 2006 -- Input/Output, Inc., (NYSE: IO) announced today that it has signed an agreement with Vehicle Source Products, Inc. (VSP) to be the exclusive provider of spare parts for I/O's AHV™ series and XVib® vibrators. With this strategic agreement, vibrator clients requiring spare parts will benefit from an enhanced level of customer service.

Established in 2005, VSP was formed to meet the market demand for spare vibrator parts, which continues to increase due to growing land seismic activity. The principals of VSP, Don Stewart and Doug Kirk, have over 50 years of combined experience in the seismic vehicle industry. Their industry experience, coupled with a key focus on logistics management, will ensure the fastest possible delivery of spare parts to seismic crews worldwide.

Customers requiring vibrator spare parts only are encouraged to continue dealing with their local I/O Sales representative or to contact VSP directly using the contact information below. Customers interested in new AHV-IV or XVib vibrators (with or without the inclusion of spare parts) or service for I/O's family of Pelton source controllers, Vib Pro™, Shot Pro™ II, and Vib Net™ II should continue dealing with I/O representatives at the following I/O regional offices.

About VSP, Inc.

VSP is a company focused on the provision of vibrator spare parts. Orders for I/O's AHV series and XVib spare parts can be placed by calling direct +1 281 431 7766 or sending a fax to +1 281 431 7729. Contact information is available at <http://www.vsp-inc.com/>.

About I/O

I/O is a leading, technology-focused seismic solutions provider. The company provides cutting-edge seismic acquisition equipment, software, and planning and seismic processing services to the global oil and gas industry. I/O's technologies are applied in both land and marine environments, in traditional 2D and 3D surveys, and in rapidly growing areas like time-lapse (4D) reservoir monitoring and full-wave imaging. Headquartered in Houston, Texas, I/O has regional offices in Canada, Latin America, Europe, China, Russia, Africa and the Middle East. Additional information is available at <http://www.i-o.com/>.
